

Sim2do

Boeing 737-800

INFORMATION SHEET

Now, you can experience piloting the real thing in a truly immersive, scratch-built simulator, with a complete replica cockpit, fully functional controls and tactile feedback, surrounding you in the sights, sounds and feel of the iconic machine. Built by Sim2do, everything from the design of the seats to overhead, at an extraordinary level of detail, to produce one of the most evocative, immersive simulators available on the market today.

Mission

Your mission will incorporate a 20 minute pre-flight briefing, an instrumentation familiarization and the opportunity to fly from 24 000 airports worldwide. The remainder of your experience will be at the controls of the Boeing 737. Your flight will be done in real time and it will be like flying the real thing. You will learn how to get the Boeing 737 off the ground (and back again) safely without incident. Your co-pilot will work with you to operate all the other flight functions that the crew is required to do to accomplish your flight. You are the pilot! We believe in "raw" flying and only use the autopilot as a last resort.

Limitations

At Sim2do Flight Simulators, safety is our utmost priority. To ensure a safe and enjoyable experience for everyone, we ask that our customers meet the following restrictions:

Maximum Weight 130kg

Minimum Height 130cm

Maximum Height 200cm

Good eyesight

No under 10 and under 16 to be accompanied by an adult.

Physical Ability

Getting in and out of the simulator is physically demanding and requires good mobility, balance and co-ordination. The rudder pedals controls are like real aircraft and need good leg strength to operate them. Please make sure the pilot is aware of these constraints before purchasing a voucher.

The cockpit is not suitable for wheelchairs.
